

**Volodymyr Tkach**  
**Software Engineer**

**Date of Birth:** XX.XX.1989

**Marital status:** Married, have child

**GitHub:** <https://github.com/vladimirok5959>

**LinkedIn:** <https://www.linkedin.com/in/tkach-volodymyr/>

**Education**

- **Cherkasy Engineering and Technological Institute**

Faculty of information technologies and systems

Master's Degree, Automated systems software

2005 - 2010

- **Cherkasy Engineering and Technological Institute**

Faculty of finance and economics

Bachelor, Accounting and Auditing

2008 - 2010 (distance learning)

**Experience**

- **2007 - 2011. Web Developer**

**Freelance at home (Ukraine)**

Different kinds of small websites and other projects. HTML layouts for websites.

Experience in PHP, HTML, CSS, JavaScript but more PSD converting to HTML

layouts. Cross-browser HTML layout (IE5, IE7, IE8, FireFox, Opera, Chrome). Main

OS: Windows

- **2009 - 2012. Web Developer**

**Visual Craft (Ukraine)**

I had been working as a full stack web developer. I was making the websites without

CMS using PHP language and with CMS. I have experience with Wordpress, Magento,

OpenCart, PHP Cake, Elgg but more with Wordpress and Magento. Converting PSD to

HTML layout. Wordpress themes and plugins, Magento themes and plugins. I used

next languages and technologies: PHP, HTML, CSS, JavaScript, jQuery, MySQL and a

little bit Borland Delphi (Pascal) (website parsing, data collection to MySQL for future

usages). Also I have the server administration skills on the Windows, Unix (Linux,

CentOS, FreeBSD). We raised up web servers for client websites, setting up PHP

modules and domain zone records. Cross-browser HTML layout (IE5, IE7, IE8,

FireFox, Opera, Chrome). Main OS: Windows

- **2012 - 2017. Web Developer**

- uCoz (Ukraine)**

- I have been working as Perl developer for almost all of my work time. Working on supporting of uCoz system, change and develop existed/new modules. Sometimes was working with HTML layouts, JavaScript, CSS, Flash Action Script. Supporting and change inner ticket system for technical support (Perl, MySQL, JS, CSS). Develop and support inner websites rating system (PHP, HTML, JS, CSS, Twitter Bootstrap, MySQL, Sphinx Search integration with PHP + MySQL). Some tools for technical support and marketing department on Delphi (Pascal) and PHP (such as automatization some processes, bots, parsers, checkers/helpers). Main OS: Mac OS X / Linux / Windows

- **2017 - 2018. Software Developer**

- Prodtech (United Kingdom)**

- Software developer (Delphi) & system administrator for Linux servers. Almost all part of time I had been working with Delphi (pascal) on existed projects (applications with databases) and new one server based web project for Windows Server (web application for IIS Server). Small part of time: system administration of Linux server for PHP projects (Debian, Apache, Nginx, PHP) and some small fixes/changes for PHP web projects. Main OS: Windows / Linux / Mac OS X

- **2018 - 2021. Software Engineer**

- Black Square Media (United Kingdom)**

- Big part of work time it was development of microservices on Ruby and some projects on GoLang. UI on NodeJS with material design and Vuetify for working with microservices. Used next languages and technologies: Ruby, GoLang, NodeJS, Python (very small part of time), Docker, Kubernetes, PostgreSQL, CI (github, gitlab, Jenkins, Drone), Cypress for UI testing, DataDog, Sentry, Linux Ubuntu/Debian, unit testing for Ruby and GoLang, terraform scripts (small part of time), auto tests, auto checks, auto deploy, database migrations (SQL), Docker files, Make files. Main OS: Linux

- **2022 - 2022. Backend Engineer**

- Master Of Code Global (Ukraine)**

- Websites and monolith projects. Ruby, Ruby on Rails, PostgreSQL, Docker, Jenkins, Sentry, RESTful API, API. Main OS: Linux

- **2022 - 2023. Software Engineer**

- Self-employed (Ukraine)**

- Websites and microservices. Golang, PHP, Ruby, C#, PostgreSQL, MySQL, Redis, RESTful API, API, gRPC, Docker, auto tests, auto deploy. Main OS: Linux
